| Program Yeterlilikleri/ Program Outcomes                                                                                                                     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. Demonstrate familiarity with major concepts, theoretical perspectives, empirical findings and historical trends in psychology.                            |
| 2. Apply basic research methods, including research design, data analysis and interpretation.                                                                |
| 3. Use critical and creative thinking, skeptical inquiry and the scientific approach.                                                                        |
| 4. Apply psychological principles to personal, social and organizational issues.                                                                             |
| 5. Demonstrate skepticism and intellectual curiosity, attunement to scientific evidence, civic responsibility and respect for human diversity.               |
| 6. Demonstrate information competence and the ability to use computers and other technology for ethical and responsible use of information in academic work. |
| 7. Demonstrate effective writing, interpersonal and oral communication skills.                                                                               |
| 8. Analyze the impact of cultural, racial, ethnic and economic factors, and of privilege and discrimination, in people's behavior.                           |
| 9. Apply effective strategies for self-management and self-improvement to self-regulate and to display personal integrity.                                   |
| 10. Value lifelong learning and ongoing professional development.                                                                                            |
