H2020 Horizon Europe proposal titled "Zero-Energy Neighborhoods in Southern and Eastern Europe - ZENSEE" in which Özyeğin University, Faculty of Architecture and Design partnered with through Building Materials and Physics Laboratory has passed the evaluation threshold but not funded due to a large number of applications.

Dr. Touraj Ashrafian has appointed by Turkish Society of HVAC and Sanitary Engineers (TTMD) to the International Energy Agency EBC - Annex 83 - Positive Energy Districts working groups. He is also involved in the COST Action CA19126 - Positive Energy Districts European Network working groups. Both groups aim to develop an in-depth definition of PED and the technologies, planning tools and planning, and the decision-making process related to positive energy districts. We are proud of this success, congratulations.

Architecture Education and The “Eyes of the Skin”

Even though traditionally architectural practice was mostly dominated by the eye and sight, it has never been so seriously discussed until the pandemic, that when it is not possible physically, “how do we experience space with the other senses” and how do we teach this experience? Due to our age, we have been addicted to the screen for many years. We mostly use our senses of sight and hearing, and touching the same surface of our cellphones over and over. But we could experience a museum or a city with “the eyes of the skin”, the senses we use to connect as Juhani Pallasmaa describes. After the pandemic, this has been interrupted tremendously. Perforce, architectural education met different challenges. Pandemic took away the eyes of the skin of the architectural education. In this era where many things are shifting from analog to digital, how can we experience the space digitally like we use to feel it or smell it? How can a student who has not experienced it physically create spaces to experience in the future? But most importantly, how can we teach to analog sense digitally? Will the pandemic be an impetus for this phenomenon to change, an opportunity maybe?

Dr. Doğa Dinemis Aman

İpek Yeğinsu; graduate student of Design, Technology and Society PhD Program, has completed her Ph.D Thesis titled "Professional Demarcation in New Media Art in Turkey". She gave the defense successfully by her advisor Dr. Ayşe Hazar Köksal. Also Müge Ertem graduate student from master degree of Design, Technology and Society Program, has completed her master thesis titled "The New Luxury of Home Decoration Objects in Turkey: A Theoretical Framework for Understanding the Consumption Motivations and Status Relationship Since 2000s". Ayşe Hazar Köksal was the advisor. We congratulate them.

Prof. Dr. Alper Ünlü, had been moderator at FORUM, Round Table Discussions which is organized by Chamber of Architects, Branch of Metropolitan City of Istanbul on 30th of May. The title of the discussion was "Architecture as E-Type".

Dr. Luca Orlandi Member of our faculty; gave an international online seminar titled "The Premio Piranesi in Turkey: designing exhibition spaces in an

Announcements

The 21st International Conference on Cultural Heritage and New Technologies will be held in Austria, Vienna between the dates November 16-18.

Call for short papers of Round Table Discussion for "How has Corona changed our daily scientific work? Chairs of the round table are Wolfgang Börner from Austria and Alessandro Camiz from Turkey, Özyeğin University. You can find more details and the conference program at:

archaeological environment", at the 2nd International Architecture Summer School in the Roman Forum, Rome, June 18-27 2021.

Başak Berument; from Industrial Design Department and Hakkı Motorcu from Electrical and Electronics Engineering Department have received the **Hackathon competition award** as First place. Competition which organized by Arçelik, titled "Youth designing the future". Competition subject was designing a sustainable city equipment by considering the high population of cities. Students designed a vertical green area for recreational use and also harvesting rain water equipment. We congratulate our students and are proud of them.

"Pandemic Architecture - Transparent Space" online workshop, in which Research Assistant Dilara Nitelik Gelirli was in the executive team, took place on the dates 7 April - 7 May. With the workshop, the students developed studies in which they reconsidered the concept of "neighborhood" in pandemic process, which is a small-scale urban

Assoc. Prof. Alessandro Camiz was appointed editorial board member for the Journal "Urban Morphology", Journal of the International Seminar on Urban Form, Birmingham, (ISSN: 1120-3544), (Web of science, AHCI listed). 2021-2024.

Dr. Zeynep Merve Uygun from Communication Design Department, attended BAFTSS Conference 2021, a three-day virtual conference on Time and the Body in Film, Television and Screen Studies, hosted by the University of Southampton, Centre for International Film Research (CIFR). Her pre-recorded paper presentation was screened at "Foregrounding the Female" section. You can find more details from the link below. <https://sites.google.com/view/baftss2021/home?authuser=0>

Also Dr. Uygun attended the 15th SIEF conference which was held in Helsinki, Finland between the dates June 19- 24, 2021. Her animated documentary film was screened at the conference audio/visual section. Also, she participated in the round table session, "Mediating Empowerment" where the films were discussed in detail. SIEF is an international organization that facilitates and stimulates cooperation among scholars working within European Ethnology, Folklore Studies, Cultural Anthropology and adjoining fields. You can find more details in the link <https://www.siefhome.org/congresses/sief2021/panels#timetable/day-21-06-22>

Dr. Zeynep Merve Uygun gave a talk on Sustainable Storytelling and Visual Ethics at Continuing Education Academy of Ozyegin University on July 23, 2021. Drawing from new media documentaries, Uygun explored non-linear and interactive storytelling during the webinar. Also she participated in Koza Role Modeling Platform's online mentoring program between March-May 2021. This online mentoring program is an innovative and effective one that aims empowering young women all around Turkey. During the 6-week structured program, the participants get to know themselves, discover their strengths, become conscious of gender equality, and learn about career alternatives that they will choose in line with their skills. This program has been designed and conducted with the support of Hüsnü Özyeğin Foundation, Fiba Group and Eşit Gelecek Foundation. You can find details at the link below: <https://koza.esitgelecek.org/etkinlik/detay/degisimin-yaraticilari-is-basina-sosyal-yenilik-tasarimi-atolyesi>
