

What is two-factor authentication and how is it enabled?

What is it?

The Information Technology of Özyeğin University operates the two-factor authentication process to secure your Özü Account. During your login to Özü systems, you will receive an authentication confirmation on your phone. You can log in based on this confirmation. In order to prevent your account from falling into the hands of malicious individuals, you need to activate the authentication process by following the instructions below.

Download the **Microsoft Authenticator** app to your phone.

Download

- Download

• Download the application for your operating system.

Go to OzU System.

information correctly.

https://mail.google.com

https://sis.ozyegin.edu.tr

- https://my.ozyegin.edu.tr
- You will use your OzU email and password for all relevant applications.
- f you have recently set a password for your account, please try this process again in 15 - 20 minutes. If you are unable to log in with all this

Please make sure to enter your OzU account

- information, please contact us via your 'Personal Email' at solutioncenter@ozyegin.edu.tr.
- Authentication Settings. Users who have not previously set up two-factor authentication will be automatically redirected to

The system will redirect you to the Two-Factor

this screen. At this stage, as indicated in the on-screen instructions, the Microsoft Authenticator
