

Part 4- Writing

Today you have learned about the future of technology, science, and business. Your teacher has asked you to write a well-organized extended paragraph* of **about 250 words** that answers the question below. Try to support your opinion with appropriate ideas, examples, and details from the texts you have **read and listened to** in the morning.

* An extended paragraph is a paragraph with a topic sentence, several supporting and expanding details, and a concluding sentence.

Considering the advances in areas such as science, technology, and business, are you mainly optimistic or pessimistic about the future of Turkey (or your home country)?

Remember the writing process.

Your notes on this sheet will **NOT** be graded.
