PhD Program

PhD in Business is a small and flexible program where as a candidate, you have the opportunity to get exposed to different disciplines and carry out your studies in close interaction with faculty members.

The PhD in Business enables you to become the expert in your topic and opens up a world of satisfying careers primarily within academia as well as research laboratories and consultancy. Curiosity, persistence and self-motivation are key to achieving this success and the expert faculty at OzU Graduate School of Business knows how to help you prepare for the challenges and opportunities ahead.

In line with OzU’s overall philosophy, our PhD program aims at stimulating a research environment that encourages creativity, originality and excellence and one that produces applicable knowledge not only valid in the context of Turkey but also on a global scale.

Areas of Study

There are four areas of concentration within the PhD in Business Program: Finance, Marketing, Operations and Management. The four areas interact and overlap in various ways both practically and academically. In addition to mastering vertically in one area, you can also work in an interdisciplinary manner across areas or trans-disciplinary concentrating on themes such as sustainable business systems.

Admissions

All candidates to the PhD program should apply with a complete application package that consists of the following components:

- 1. Online Application Form

Global Focus

All successful PhD students visit top league Us schools to complement their studies.

Ease of Date-Access

Subscription to world’s most “on-demand” databases provide ease of access to data.

Message From The Director of PhD in Business Program:

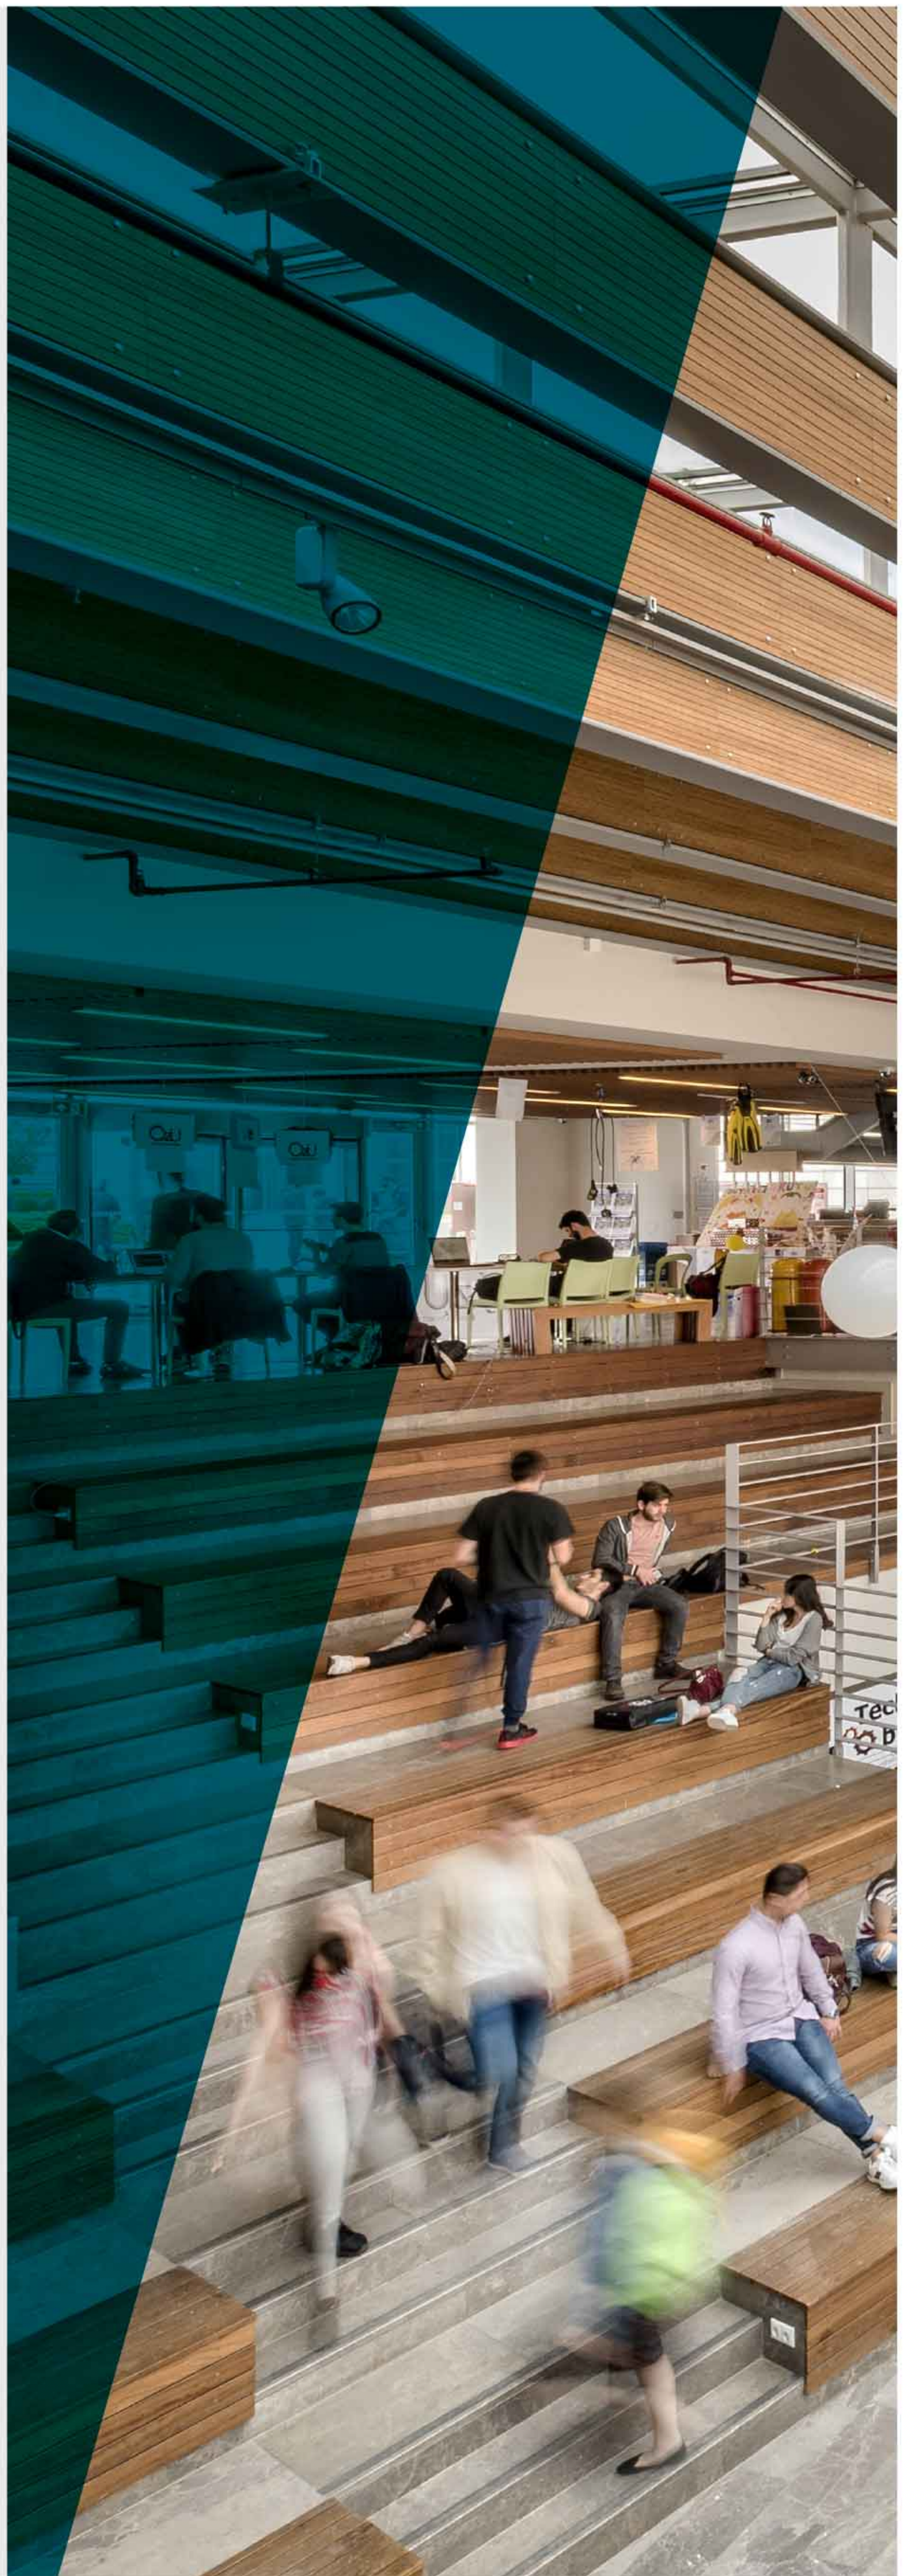

The PhD program's mission is to educate the leaders who will be instrumental in charting the next generation businesses in the connected economy. This mission is achieved by a combination of guided, self-paced research opportunities followed after completing a rigorous foundational two-year program.

The essential tools and techniques as well as necessary skills and technical knowledge are acquired during the first two years. The first year provides a comprehensive orientation to the academic discipline. The PhD candidate is expected to acquire a broad perspective in the key study areas through introductory survey lectures that cover finance, marketing, operations and management. A holistic understanding with the right academic rigour provides abundant opportunities to be creative both from a methodology and an implementation point of view.

The business world is increasingly under pressure to keep-up with the changing nature of value. The stake holders demand increasingly innovative and technology-driven solutions. Our environment provides fertile grounds for data scientists and for acquiring deep-area expertise, key traits for the next generation leaders. I hope to see your application to the program if this path excites you.

Assoc. Prof. M. Tolga Akçura
Director
